

SHAD HOSSAIN

Full-Stack Developer — Laravel / React / JavaScript

+880-1775439274 • shadhossain01@gmail.com • github.com/Shad-Hossain • Dhaka, Bangladesh

OBJECTIVE

Computer Science undergraduate seeking a remote junior developer role in Laravel / React / JavaScript. Hands-on experience taking full-stack web applications from database design through deployment, including a civic-tech platform and a real-time campus portal built end-to-end solo.

SKILLS

Languages:	C, C++, HTML5, CSS3, JavaScript (ES6+), Java
Currently Learning:	TypeScript, Python (Basics)
Frameworks & Tools:	Laravel, PHP (PDO), MySQL, Git, GitHub, REST APIs
AI Development:	Proficient in leveraging AI coding tools (Claude) for efficient prompting, iteration, rapid prototyping, and debugging to ship production-scope apps.

PROJECTS

SafeVoice — Civic Tech Platform

Laravel · MySQL · Sanctum

Anonymous complaint-filing and emergency-response platform built as an academic project with startup ambitions; assessed as conference-publishable at ICCIT/ICIET level.

- Implemented Sanctum-based authentication with HMAC-SHA256 anonymous identity separation and OTP verification.
- Designed a PI case-assignment system using 48-hour token chains with automatic reassignment, and Haversine-based SOS geo-matching.
- Built lawyer OCR verification, a bidding/commission payment system (bKash/Nagad/bank), FCM push notifications, and multi-tier admin roles.

Campus Pulse — Real-Time University Portal

PHP 8 (PDO) · MySQL · Vanilla JS

Independently built the entire application for this Web Programming course project: a role-based portal (student/faculty/admin) for UIU news, events, achievements, and research grants.

- Implemented an events approval workflow, a resources hub with file uploads (notes/question banks), and campus-wide status alerts.
- Added an Emergency SOS feature using the Haversine formula with expanding-radius geo notification and FCM push delivery.
- Shipped distinctive UX details: dark mode, a Ctrl+K command palette, live active-student counter, and profile photo uploads — all on a session-auth PHP/PDO backend, no framework.

Compass — A Tourism Guide

PHP · MySQL

- Developed a tourism guide platform covering hotel bookings, ticketing, and shared rides.
- Designed an Emergency SOS feature for traveler safety.

EDUCATION

BSc in Computer Science and Engineering (CSE)

United International University (UIU), Bangladesh

Batch 232 | Student ID: 0112320128 | CGPA: In Progress

ADDITIONAL INFORMATION

- **Founder, LIYASYNC:** A Bangladesh-based jute and leather sourcing/buying house, run in parallel with academics and development work.
- Actively pursuing a structured Laravel + React learning path aimed at a full-stack remote developer role.
